ABOUT ME

Software Engineer with over 2 years of experience delivering high-quality solutions through effective collaboration, technical expertise, and problem-solving. Skilled in Agile methodologies with a strong history of designing, implementing, and managing web services. Holds a bachelor's degree in computer science in technical discussions, coding, testing, and integration. Eager to leverage proven skills and achievements to contribute to dynamic, fast-paced projects.

WORK EXPERIENCES

GUUD International, Phnom Penh, Cambodia

November-2022 Present

Software Engineer

November 2022 – Present

- Designed and developed core functionalities for the **Cambodia National Single Window**, improving system efficiency for trade facilitation.
- Implemented secure and scalable payment integration for the **ACLEDA E-Commerce Payment Gateway**, supporting seamless online transactions.
- Built logistics solutions for **Singapore Clickargo**, enhancing supply chain management and improving operational workflows.
- Developed and maintained the **GFAS eWallet** system, introducing new trade finance features under the Trade Finance Application Portal, resulting in increased customer satisfaction.

- Maintained and enhanced functionalities in existing projects, ensuring seamless backend and frontend performance.
- Designed, developed, and implemented an API Gateway for third-party integrations, providing technical guidance to stakeholders and ensuring project timelines and deliverables were consistently achieved.
- Deployment testing across Development, UAT, and Production environments to ensure system stability and functionality.
- Prepared and executed data migration plans, ensuring data integrity and successful transition between environments.
- Documented deployment procedures, test cases, and migration steps to ensure repeatability and knowledge sharing within the team.

Mungkul Serey, Phnom Penh, Cambodia January-2021 to 2022

Software Engineer

January 2021 – December 2022

- Created and deployed a fully functional Web Service for Mungkul Serey Catering Services, automating order management and improving service delivery.
- Ensured the scalability and maintainability of the web application, enhancing the client's ability to manage high customer demand effectively.

ACADEMIC PROJECTS

Build Bright University (2023) Inspection System:

- Enabled inspectors to collect data from restaurants and hospitals to maintain the highest standards of healthcare facilities. Technologies Used: Spring Boot, Spring OAuth2, ReactJS.
